NOW FOR BUSINESS.

Members of the New Cabinet Assume 3 heir Respective Duties. Washington, March 6th.—The new Cabinet members took possession of their respective departments to-day. Postmaster General Wananaker arrived from Philadelphia this morning. All called at the White House and paid their respects and received their commissions. They then went to the departments and took the oath of office.

then went to the departments and took the oath of office.

Secretary-of-the-Navy Tracy was the first to qualify, which he did at 11:30. *ecretary-of-war Protor was the next, and the others as fast as they reached their respective places. Blaine took the oath at 20 clock. The various chiefs of divisiors and other prominent officials each waited on the new Secretaries and ten dered their resignations, but were generally asked to wait awhite.

The newly qualified Cabinet officers had little opportunity to attend to official business this afternoon, as they were engaged in receiving a continuous line of callers

Assistant Secretaries Thompson and M-ynard had a special interview with Secretary Windom this afternoon and placed their resignations at his official duties until he completes the organization of his department in accordance with his official duties until he completes the organization of his department in accordance with his own wishes, and therefore they would continue at their desks until their successors were selected. Windom replied that he appreciated the r kindness, and would not act upon their resignations until he had conferred with the President on the subject.

So icitor-General Jenks has tendered his resignation to the Fresident, to take effect at the collection of the Attorney-General. Miller to-d y requested Jenks to remain for a few days until he becomes a little more familiar with the business of the Department, and he consented to do so.

Pacific Coast Applicants for Positions The Words Full of Them.

Washington, March 6th.—A meeting of the Republican members of the California delegation will be called by Senator Stanford within a few days, to reach an agreement on matters pertaining to the interests of that State. It is hoped that a harmonious understanding can be arrived at with reference to recommendations that shall be made to the President regarding appointments. The number of candidates for the othices is legion.

A determined effort will be made to secure the appointment of ex-bepresentative Wren, of Nevada, as Commissioner of the General Land Office, and the California as well as the Nevada Senators and Representatives have united in requesting his appointment. Mr. Wren is very highly spoken of by the Pacific coast people in Washington. The position of Commissioner of the Land office is regarded as a more useful position to be filled by a coast man than any cabinet office, except those of the State, Treasury and Interior.

It is expected that California will be given one or two foreign Missions, and that the name of John F. Swirt is mentioned in connection with the chinese Mission. Mizner and General Dimond are applicants for Superintendent of the Mut, and John P. Jackson for Collector of the Port, and ex-Postmaster Stone would be pleased to return to his oid position.

Whitelaw Reid is most talked of for the British Mission. John C. New of Indiana is understood to be slated for either the Ital an or Spanish Mission. An impression prevails that William Walter Phleps may be made Minister to France. The Woods Full of Them.

O'Neil o' Onio, who made the majority report, had apparently written that do ument after the perusal of Sullivan's brief, while Russell, who made the minority report, had carefully examined the testimony. It was impossible to decide the case on its merits, Mr. Felton says, without three or four days' discussion. The report was not used, he says, to fillbuster against the Cowles bill, because the Republicans had an understanding with Randall to vote for that bill whenever he could get it up. The Democrats refused for two years to call up the election case, and then used it as a club to prevent consideration of the Cowles bill.

A DAY AT THE WHITE HOUSE.

Washington, March 6th.—At 11 o'clock this morning the President received a large delegation of Indianans, and in response to a speech of congratulation thanke them and said he would endeaverto do his duty and uphold the honor of the Government. The public were next admitted, and in an hour and a half at least 5 000 persons rassed through anu shook his hand. The crowd outside the house grew larger, and finally the doors were closed and the Presiden went out on the front steps, where the crowd passed by him to the number of several thousand. The people frequely cheered and the President responded by iffing his hat.

The afternoon reception of the public lasted two hours. Among the callers were a delegation from Alabama, contestant Small of South Carolina, with a number of colored friends, the Governor of lowa and staff Colonel Fred Grant and ladies and the Cyclone Flambeau Club of Atchison, Kansas

At 3 o'clock the doors were closed, and the President entered his carriage to seek a much-needed rest in a drive around tow.

BAILROAD SUBJECTS.

Conference Yesterday.

Washington. March 6th.—The first subject discussed at to-day's session of the State Railroad Commissioners' conference was that of uniform classification. At the conclusion of the debate, a resolution was adoption declaring that a uniform classification of freights would promote the weifare and convenience of shippers and of the railroad companies, and commending a conservative but persistent effort to that end. The whole subject of uniformity in railway legislation was referred to a committee with instructions to report at a latter session.

On motion of Crocker a resolution was adopted urging the Interstate Commerce Commission to earnestly consider what can be done to prevent great loss of life and limb in coupling and uncoupling freight cars, and further in what way the growth of the system of heating passenger cars from locomotives, or other ringle sources, can be promoted, to the end that the Commission may make recommendations in the premises to the various railroads within its jurisdiction, and make such suggestions as to legislation on these subjects as may seem to it necessary and expedient.

WASHINGTON, March 6th.—Secretary of State Blaine was the helpless recipient of an ovation to-day that would have turned a less-level head than the one he carries on his shoulders. He had paid a visit to President Harrison, with whom he held a close but brief interview, and was passing out of the White House, when he was recognized by the great crowd about the door, which cheered him loud and long. The men packed about him and kept him handshaking for half an hour, while the air was rent with huzzas in his honor. It was with difficulty he made his way out of the grounds.

NATIONAL EDUCATORS.

of Calliornia.

Washington, March 6th.—The Department of Superintendents of the National Association began its three-days' session to day. The attendance is larger than at any previous meeting, twenty-nine States being represented. Superintendent Fred M. Campbell, of Oakland, Cal., as President, called the meeting to o'der, and his brief address of welcome was well received. In the course of his remarks he said:

"As President for the year, I have the pleasure of calling to order, for its spring session, the Department of Superintendents of the National Educational Association of the United Statesthe grand army of 312,000 public school teachers of our country—those whose office it is to conserve and to direct that most important factor of our national prosperity, the American system of free non-sectarian, non-political public schools. The seene wirnessed two days ago in this citylmay well have drawn hither the great concourse of people who thronged the halls and thoroughfares of the nation's Capital. Nay, more than this, it is a scene which may well have centered the

gaze of the world. But, gentlemen, it is the interests which were present which has largely made this scene thus possible. Cause must ever be greater than effect. Under the dome of the Capitol and in the chamber of the Cabinet the machinery of legislation does its work, but the real force lies far back in the development of the brain force and the training of the will power that gave us men capable of regulating affairs so complex and so vast. Viewed in this light, our assembly is one of no small import, and its deliberations assume a dignity that cannot be easily overrated."

Deputy United States Commissioner Holcomb was then introduced and pronounced an address of welcome, after which the regular programme was entered upon. The Convention will adjourn on Friday evening.

A GORGEOUS SPECTACLE.

The Magnificent Pyrotechnic Display in Honor of Harrison. Washington, March 6th.—The display of deferred firewarks from the Monument Grounds to-night was undoubtedly the most brilliant ever witnessed in Washington. The exhibition began with an illum ination of Pennsylvania Avenue, from the Treasury Department to the Capitol, a distance of over one mile, by means of magnesium suns. The night was uncommonly dark, and the great white shaft of the Washington Monument afforded a background the peer of which can hardly be found in the world.

The first set displayed was composed of large portraits of President Harrison and Vice-President Morton framed in brilliant colors and resting upon an easel. So lifelike were these portraits that at a distance of a mile each was readily recognized. Following these came marvelous fountains of

Hard to Break Away.

Washington, March 6th.—There seems to be but little diminution in the crowds in the city. All the military and political organizations from abroad have returned to their homes, but the hotel corridors and lobbies are packed with people. The boarding-houses are still crowded, and the exhibition of fireworks on the White House lot to-night was witnessed by over fifty thousand people. The President and his family witnessed the exhibition from the windows of the Executive mansion.

Commissioner Stone Resigns. Washington, March 6th.—Ex-Postmaster Stone to-day resigned as a member of the Cemmission to select a site for the San Francisco public building. He says that he is not sufficiently familiar with the value of the sites that have been offered for sale to decide upon the selection of either one of them. Ex-Representative Felton was offered the Commissionership before Mr. Stone was appointed, but he declined to take the place. Who will be chosen as Stone's successor is not known.

Troth. of Virginia: Charles Roberts, California; Benjamin Colim, Michigan, and R. W. Ruter, of Florida. Important Land Decision.

WASHINGTON, March 6th.—Land Commissioner Stockslager has decided that there is no authority for the reservation of 52,000 acres of land included in the preliminary survey of the Tumacarori and Calabazas private land claim in Arizona. This decision also affects 3,000,000 acres in New Mexico and Arizona. Short Senatorial Session.

Washington, March 6th.—The Senate met at noon to-day, and six minutes afterward adjourned. The galleries were packed with people, who were greatly disappointed. If Mr. Harrison has any nominations to make, they must be sent to the Senate early in the day.

BERLIN, March 6th .- The National Gazette com BERLIN, March 6th.—The National Gazette commenting on Harrison's inaugural, says there is no reason to doubt the President's pacific principles or the sincerity of his opinions regarding a peaceful adjustment of international difficulties, although he recommends the strengthening of the navy. His tone toward foreign countries proclaims the heads of the strengthening of the navy. ries proclaims the beginning of a new era in American developments and the display of a more assertive policy by the United States.

THE WAR IN AFRICA Particulars of the Late Battle Between

Zanzibar, March 6th.—Reports have been received of severe fighting at Bogomoyo Sunday. The Arabs attacked the German landing parties furiously, but were driven off by the combined fire of the men-of-war and the work of the sailors and mannes. The Arabs fought desperately, never receding an inch until the dead and dying lay around in large numbers. There was no attempt at flight until their chief, Bushisi, fell, mortally wounded.

The Germans recaptured two cannon which the natives secured in a former battle. No effort was made to take prisoners. The Germans now are strongly intrenched at Bogomoyo, and hold the place permanently to smooth the way for Wissmann's expedition. Germans and Arabs.

The disease first made its appearance on Fishing creek last August, and has been growing worse steadily.

GETTING A MOVE ON. Inticipated Exodus of Colored People from North Carolina.

RALEIGH (N. C.), March 6th.—What looks like the beginning of an extensive exodus of colored people is noted here. Last night addresses by two colored preachers and a lawyer were made, in which the negroes were urged to go to Kansas and Arkansas, but not to Louisiana and Mississippi. The advice was listened to by about 2,0.0 persons, all colored, and made a great impression, particularly uron the woa great impression, particularly upon the women. It was stated by the speakers that meetings like this would be held all over the State and the announcements had been made from the pulpits of many churches, and would be made from all made from all.

It was further stated that 40,000 negroes were wanted in Kansas, and that negroes would also be given work and made welcome to Maine, Vermont and Massachusetts. The railway fare from here to Kansas has been put down to \$11. That State appears to be the most popular, and many labor agents from Kansas are at work in the State.

ASPEN (Col.), March 6th.—A marvelous discovery of mineral is reported from Marcon, in this district, the particulars of which were made known to-day. Harry Adams, a prospector, was opening a trail to the Florence Belle mine, when his attention was attracted to a heavy outcrop of spar some few feet distant. Pushing to the locality, he was confronted by a well-actined vein, exposed at the surface. Gathering the float, he found it impregnated with brittle and ruby silver, equal in metal richness to that recently developed in the Millie Gibson, the ore from which runs from \$5.000 to \$12,000 a ton, and is considered the wonder of the camp. The new vein is two feet between the walls, and shipments from it will begin at once. The discovery has created intense excitement, and the assay office that is testing the mineral is crowded with excited spectators awaiti g the returns.

Increasing Interest in the Nevada County Election Case. NEVADA CERY, March 6th. - There is no abate ent of public interest in the Lord case Morateur, Inspector of the Boston Ravine Elec-tion Board, was kept on the witness stand til the middle of the afternoon, and stuck closely to his former statement that the Board's coupto his former statement that the Board's count was carefully and regularly conducted, also that the seal on the envelope containing the ballots had been tampered with after being delivered to the County Clerk and before opened in the civil contest case of Lord against Dunster.

County Clerk Beatty and Deputy Clerk Harris testified at length, showing that they exercised extreme care to prevent the ballots from being obtained possession of by outsiders.

Members of the last Grand Jury testified as to the identity of the ballots, showing that no changes had been made while in their possession.

At the time of the adjournment the prosecu-tion had just put a voter of Boston Ravine on the stand to prove that the ballot cast by him had Dunster's name erased and Lord's substi-tuted, whereas he voted for Dunster. There are said to be several other voters who will swear to the same effect. The more evi-dence introduced so far, the more mystery en-shrouds the case.

A Negro On the Negro's Future.

The latest contribution to the discussion in the Forum of the negro question, is by a negro writer, Prof. W. S. Scarborough, of Wilberforce University, Ohio. In the March number he reviews with a deal of severity the treatment of the negro question by the representatives both of the South and of the North. Best of the future of his race he takes a very hopeful view. He writes: "That which the South declares it will not have-negro supremacy —has no part in the negro's plans for his future, nor is it desired by him. He simply seeks to exercise undeterred the freedom to enjoy rights guaranteed him as a citizen by the Constitution. He leaves all else to the future evolution of just public sentiment, and to private choice. He has no desire to rule over or to harm the whites. Pushed from the ground of negro supremac the fear takes the shape of 'being left to the mercy of an ignorant black majority, and 'reconstruction days' are cited by Sen ator Wade Hampton as proof of the evils in store, and as reason for abrogating the negro's rights. I answer this by saying that there could now be no such ign rant rule as is claimed to have existed then. The conditions which governed those days have changed. The negro has in the meantime made a remarkable advance in intelligence and education. The admitted progress of the race has given birth to leaders, younger and better edacated, to replace those ignorant and irresponsible ones. These fears are groundless and are not at the root of the feeling but that which does underlie the whole matter and which gives the key to the listurbance is the deep-seated prejudices of color and caste. As a member of that race, I believe the negro is looking over the whole situation as a patriot should view it-with an eye not only to his own prosperous growth, but to that of the American people, of whom he considers himself an inseparable part. With such a view he can but take that step which will lead from present troubles to a fruition of his hopes-to

be a man among men and not simply a The Augusta (Ga.) Chronicles (Democratic) says: Under the fostering influence of a judicious tariff, there is no end to the material development and wealth-producing capacities of the South. There i no section that needs a protective tariff nore than the South, and there is none that will derive any greater or more lasting benefits from its just discriminations

Catarrh to Consumption. nd undoubtedly leads on to consumption. It is herefore singular that those afflicted with this fearful disease should not make it the object of their lives to rid themselves of it. Deceptive remedies, concocted by ignorant pretenders to medical knowledge, have weakened the confidence of the great majority, of sufferers in all advertised remedies. They become resigned to a life of misery rather than torture themselves with doubtful palliatises.

But this will never do Catarry must be met with doubtful palliatises.
But this will never do. Catarah must be met at every stage and combated with all our might. In many cases the disease has assumed dangerous symptoms. THE JUTE MILL VERSUS PRISON

The struggle on the part of States to make a prison self-sustaining by the industries conducted therein, is a notion as crude tem is that which debases the criminal, reduces a penal term to abject slavery, subcated officers and to debasing association within the prison walls. The prison system which increases crime in a commonwealth is the costliest which could possibly be devised. That system which reduces crime is the cheapest; and of all the devices which constitute a departure from what has been discovered to be a true penological system, a jute mill, run day and night, is perhaps the most conspicuous. The convict acquires by this means, no useful employment by which he can be selfbe pful; he acquires no discipline of industry by which the baser propensities of his mind may be subdued, and a State which d-liberately condemns a manslaughterer, a burglar or a thief to a term in a State's jute mill, has no reason in the world for discharging him at any time, because his life in the prison does not afford the slightwhen he entered he is less criminal when in some measure reformatory in their mature; unless the general tendency of a perological system is in the direction of eliminating a criminality from the propensities and dispositions of men, unless the direction of energizing those faculties of the mind upon which good citizen-

uction of jute bags as an evidence that the prisoners are serving in a measure some good office to society. With the child-like faith that a jute mill is the one ong sought and lately discovered industry ich will subdue the criminal propensities shift and run day and night. The criminal commutations, a period of ten years, has reached the age of thirty when his disprison devoid of mechanical skill, devoid sonal acquirements, utterly devoid of that coanly character which a discipline of apprenticeship in some useful oc-

either in the day or the night time, and is restored to society. His conduct proved, minal tendencies. What guarantee does New England Dinner rison history afford that those tendenhave been subdued? He bas acquired no skill which may be valuable to him in the world at large; he has acquired no displine of diligence; no handicraft; no inaction to those aspirations of the mind which are associated with pride of personal acquirement. The industries of the world aunot make him available. The foundries, the machine shops, the work shops, greet him as a stranger. He has not been to where I am prepared to give general satisfaction in the different branches of the Machinist and Locksmith outlines. The prison has given birth to a full-grown infant, helpless as infancy, and opment of mental characteristics and ring character, forming motive, fashion-

worthy channels, and even with all these children, of society, of religion, men fall away from the right path. If, therefore, prived of all these influences, fails to benot invest a condition more certain ture, than a prison system with a jute mill

and philanthropic men, enthused with the voted their lives to that highest realm of benevolence, the reformation of the crim tion have been given to the world, and the eners and conclusions flowing therefrom constitute the incipient beginnings of a science known as penology. The mos glaring retrogression of all that has been known, all that has been discovered, al that has been vonchsafed to the world or the subject, is a jute mill.

No one who has observed the course of the New York Times expected that journal to find anything in the inaugural of President Harrison worthy of commendation. The Times possibly thinks, by this time, that it is a little singular that nearly all the people of the Union differ from it in its estimate of the aldress. That paper is a cynic; it finds very little in this world that rises to its conception of what is world, wise and commendable. The Chicago Times, which indulges overmuch in the sneers also, on the other hand finds so much of ment in the inaugural that it frankly admits that it will meet with the hearty indorsement of the people. PRESIDENT Harrison must be gratified with the cord a welcome given to his inau garal address by the press and the country generally. It has been, save in a few quarters, where fault-finding is mistaken for criticism, approved as statesmanlike. s't cere and patrictic, and as forecasting a g seral policy that will conserve the high est interests of the nation at home and its honor and dignity abroad.

in Subdivisions of 10, 20 and 40 acres each, about 7,000 ACRES

of Fruit, Vegetable, and Alfalfa Land, within one to seven miles from Bakersfield, being portions "Hop Ranch,"

"Cotton Ranch," "Jewett Ranch." and other Ranches. Also, Choice Residence and Busi-

ness Sites in Bakersfield.

COLONY TRACTS. This is the initial offering, and the commencement of the subdivision of the large possessions of Mr. J. B. HAGGIN, in Kern County. The property embraced in it includes some of the finest lands in the county, as all well informed residents of BAKERSFIELD will testify. About 2500 acres of the land offered is in affalfa, and can be rented or otherwise utilized to yield a large income, and a high percentage upon a valuation of from \$150 to \$200 per acre. Other portions of the offering are used for vegetable and garden purposes, while the balance is composed of land rich and fertile, awaiting only the industrious settler to demonstrate its great adaptability to fruits and the products of this wonderfully prolific soil. A large portion of these lands lie along and adjacent to UNION AVENUE, which as at present dedicated extends from Kern River south through BAKERSFIELD, a distance of 10 miles, and which is 115½ feet in width. The other tracts are reached by excellent county roads leading direct to BAKERS-FIELD.

Town Lots. With the immense settlement that must in the nature of things follow the subdivision tion that will pour into this section of the country, transforming the county into one gigantic colony, with its countless number of orchards and vineyards, drawing to it men of enterprise and capital, BAKEUSFIELD, with its incomparable water power, and other natural advantages; with its railroad facilities at hand, and the almost positive certainty of being the terminal point of another line, will grow to, and become, beyond a doubt, a city of great proportions, and town lots will become very valuable. Within the last year extensive improvements have been projected and completed at BAKEUSFIELD. The SOUTHERN HOTEL, a large and handsome brick and iron structure, costing \$100,000, will be opened to

structure, costing \$100,000, will be opened to the public about the middle of March, ensuring all who attend files ale comfortable accommodations. A street railway has been in successful operation for a year, the town is well supplied with water, and a fine quality of illuminating gas is furnished from the works just completed, at prices ruling in other interior cities. Other important enterprises of a private nature are contemplated and some well under way. The lots we offer are centrally located, and within a few blocks of the new SOUTHERN HOTEL. Villa Lots. For speculative or practical purposes, the villa lots included in this offering must commend themselves to all. Their proximity to the railroad and the business center of BAKERS-FIELD, and the remarkable fertility of the soil make them extremely valuable for suburban homes, while their future worth can scarcely be overestimated.

WATER FOR IRRIGATION. The lands to be sold are amply supplied with water for irrigation, from the Kern Island Canal, at rates now the lowest in the State, and fixed and regulated by the County Board of Supervisors.

UNUSUALLY LIBERAL TERMS TERMS OF SALE: - Only one-fourth Cash. Balance in 1, 2, and 3 years, with interest at the rate of seven per cent per annum.

The Democratic City Central Committee met last evening at the parlors of the Capital Hotel at 8 o'clock, and immediately went into executive session. That all was not harmonious was learned early in the day, and that they had a very stormy session was afterward ascertained.

It has been the custom of the Central Committee of the Democracy to always appoint the delegates to the Convention, and if the members of that august body were n favor of any particular individual or set

of candidates, the complexion of the Convention was shaded accordingly. Heretofore the Chairman of the Central Commit-tee has been allowed to name five delegates from each ward, and the Central Committeemen named the other 25, making 30 from each ward, making a Convention of

Last evening Thomas Fox, the Chairman of the City Central Committee, essayed to use that prerogative, but was sat down upon in a most decisive manner. The members of the Central Committee ignored him entirely and named the full quota of Board of Supervisors.

The Board of Supervisors met at 10 A. M. yesterday. Present, Tebbets, Greer and Black, Messrs. Bates and Ross being absent visiting the new bridges constructed the committee in unmistakable terms what he thought of them. Dick Singleton, the Democratic boss from the Third Ward led

They ask to be allowed to charge \$1 50 per thousand for booming. Mills will be put up at the boom, and millions of feet of lumber sawed at that point annually. The sawdust would be either burned or sold to pulp mills, at any rate it would not be allowed to enter the river.

N. L. Drew and E. J. Holt, two gentlemen who have been engaged in the lumbering business for many years, say that a charge of \$1 50 per thousand for logging logs would be a very small charge.

Further consideration of the matter was postponed until to day.

Quintette Club Concert. The Mendelssohn Quintette Club, of Boston, will give a concert at the Metropolhundred manuscript letters over the signa- itan Theater to-night under the direction of its founder, Thomas Ryan. The club gave a brilliant concert here some years ago. Its present composition is Herr Wil-helm Ohliger, solo violin and concert master; Manassa Adler, solo violin; Thomas Ryan, solo clarinette and viola; Herr Fritz Schlachter, viola and violoncello; Herr Anton Hekking, solo violoncellist to the King of Holland, and Miss Alice Ryan, prima donna soprano. Very compliment-ary expressions of the Vienna, Duseldorff, Berlin and Geneva press are shown com-mending Ohliger and Hekking, and for Adler and Schlachter there are many flattering testimonials. Ryan is well-known

to the American musical public. Miss Ryan is a debutante approved warmly by Madame Marchesi, of Paris, the celebrated The High License Meeting.

The high license meeting at Pioneer Hall yesterday was held with closed doors, and reporters were excluded. On the members coming out it was ascertained hat the general public expression of entire confidence in the Republican nominee, Mr. Stevens, and in his record as a citizen, devoted to the best interests of the city, led the meeting to take further action The committee, it was learned, that went to interrogate the candidate reported that Mr. Stevens refused to pledge himself to anything; that he said his life here was an open book, and if elected he wanted to be untrammeled by any promises, and that if elected he would do his duty faithfully, as he saw it.

The News-Letter is very pleased to learn that the "Golden Gate Special" is steadily increasing its business. The Southern Paupon its line, and each trip adds to the number of persons that travel by it. Each one informs his or her friends of the comfort that can be secured by this more re-fined mode of traveling, and each traveler helps to bring another. From gentlemen who have been fortunate enough to enjoy the advantages afforded by the "Golden Gate Special," we learn that it is far superior to any Eastern train, not only in its equipment but also in the steward's department. A better meal can be secured than in most hotels, and as good as in any. All seasonable luxuries are provided, as well as every delicacy procurable from New York to San Francisco. The attention and civility received from the conductors and other attendants is unequaled on any other

train in the country. All this was treely told to George Pullman in Chicago, who, naturally, felt pleased at the unsolicited commendation, yet he expressed his confidence at being able to make still further improvements. 'I don't see what more you can do," replied the traveler, "unless you give us a howling-alley." On an Eastern line, recently, a conductor asked two Golden Gate travelers what they thought of the new train. They both expatiated freely upon the pleasure they had experienced upon their trip, when a third gentleman, who was present, led them on to answer a number of questions relative to the barber, the waiters, the food, lighting, heating of the ears, and everything that could be thought of. When they had told him that all was infinitely better than the train on which they were traveling—the Pennsylvania Central—he introduced himself as one of Mr. Pullman's superintendents, and was of course glad to learn that the employe were so warmly indorsed by strangers. I s hoped that a second similar train will soon be put on the line, when travel war-rants it. There is no doubt that before ong all the available accommoda these trains will be engaged weeks ahead, as they are the means of abolishing the discomfort and tediousness that naturally oc

favor of dividing So'ano county and creating the county of Vallejo, out of a territory twenty miles square. He read from a minority report of that committee, which stated that the people in the proposed new county were unanimously opposed to the creation of the new county, yet the Senator now opposed the creation of a county when the people in the new county were almost unanimously in favor of it. From the journal of the same session he quoted a report made by Senator Boggs in tayor of the crestion of the county of San Benito, on the ground that the new county would have sufficient area, wealth and population and leave the old county in a like condition. The present bill presented the same case. He read statistics to show that the new county of Glenn would have more than double the amount of assessable property and double the amount of assessable property and both in a like condition. The present bill presented the same case. He read statistics to show that the new county of Glenn would have more than a population than San Benito county had. On this showing the Senator from Colusa ought to be the chief advocate of this bill.

The speaker argued that it was absurd to say that a enastor representing a certain district should have the sole say about laws affecting it. If this were the case a Senator would be able to dictate and control everything in his district. Each Senator might as well meet by himself in his own district and decide all matters affecting it, and the State be bound by their action. In regard to submitting the question to a vote of the people and Senator Boggs opposed it as bitterly as he now did this bill. It was ridiculous to say that Senators did not know anything about Colusa county because they had not been there. They knew all about the county from the school books, the maps, the newspapers, and from the hundreds of citizens who had come to the Capitol and given information in regard to it. He concluded his remarks by an appeal to the Senate to pass the bill.

GLENN COUNTY.

At 1:50 the Senate took up the Glenn county bill and Goucher moved a call of the Senate, which was ordered.

Senator Flint was brought in and excused, when further proceedings under the call were dispensed with.

The bill was then read a third time and discussion of its merits was commenced.

Boggs called on Meany to give some reasons why the bill should pass.

Meany said that this question had been a bone of contention in Colusa county for a long time. He said that two years ago Boggs introduced a bill to divide Colusa county, but before the session was over changed his mind and opposed the measure. He went on to say that a petition had been circulated within the limits of the proposed county which had received a thousand signatures within twenty-four hours. He then proceeded to advance the arguments of the senator opposed it.

The motion was lost by a vote of 11 ayes to 27 noes.

It was then decided, on motion of Goucher, that the consideration of the bill be continued until 6 p. m., when the Senate should take a recess until 8 p. m. and then resume the consideration of the oill.

Campbell said that he opposed the bill because the Senator from Colusa did so. He believed it his duty to vote on local matters with the representative from the district affected.

Preston took the same ground. The custom the senator representation and that the Senator from Colusa did so. He believed it his duty to vote on local matters with the representative from the district affected.

Preston took the same ground. The custom the senator from Colusa did so. He believed in local representation and that the Senators from the various districts were elected to represent those districts. He had admired the conduct of the Senator from Colusa in the senator opposed to what he would have done two did so the senator opposed it.

Genue a various districts were elected to represent

ing the bill.

Goucher ask d what he would have done two years ago, when the Assemblyman from Coiusa favored division and the Senator opposed it.

Preston replied that the Assembly was a separate body and the Senate was not responsible for its actions. He then proceeded to argue that a law should be passed permitting coun ties to be divided under a general law.

Mead said that he had no intention to say a word on the bill, but some remarkable arguments had been used by the last two speakers. No Senator could represent but one side of a question of this kind, and it was the duty of every member on the floor to examine the other side and see whether that Senator was doing his whole duty and fairly representing all of the people. He had been in doubt how to vote upon the bill, but he had visited the proposed county on Sunday last and was convinced that it ought to be created. It was to be composed of forty townships of magnificent country, and the people asked to be allowed to have a county of their own. The old and new counties would both be better off for the division. He said that from the information he had he believed that half of the people of Colusa county and half of the people of the town of Colusa were in favor of the division.

Caminetti spoke against the bill on the ground that on purely local matters the representative.

since you must be bill, the country buildings, costing over six as an injustice to the people in the proposed new youngs, it would entail upon them the cost of the erection of new county buildings, which it was claimed would only cost about \$20,090, but which in reality would be likely to cost \$100,000. He would have tried to amend the bill, so as to change some of the Commissioners, but he knew it was of no use. It was not a fair distribution, as two of the Commissioners were from Wilcows and another a short distance were from Wilcows and another a short distance were left to the representatives of the district affected, and it ought to be so county bad refused to it troduce it in the Senate, because he knew the wishes of the people of that county. The men who had made up their minds to vote for truit bill did not know the needs of the county or wishes of the people there. If this was to be the rule it menaces the warms of the people of the county was farenessed to introduce it in the feets of the people of the county. The men who had made up their minds to vote for truit bill did not know the needs of the county or wishes of the people there. If this was to be the rule it menaces the division. If the people of the county were defects in the bill, under the content of the people of the county of the people of the county of the people of the county of the chair the point of the people of the county. The men who had made up their minds to vote for truit bill did not know the needs of the county or wishes of the people of the county or the people of the county or wishes of the people of the county or wishes of the people of the coun

authority for the election of a Judge of the Superior Court at a special election. He must either be appointed by the Governor or be elected at a general election. The friends of this measure, if they desi e to make it effective, should amend it if they wish to have it constitutional. The bill would disfranchise the people of Glenn from voting for Congressmen, Member of the State Board of Equalization and Railroad Commissioner at the next election. It would lead to litigation. He would have offered these amendments but for the fact that it would have been charged that he was trying to delay the bill.

At 5:35 Heacock move to take a rece s until 8 noes.

Mofilit said that no amount of talk would change the result, and unless the argument was proceeded with he should move the previbecause he believed it was vicious, mainly be-cause it arbitrarily divided the county without submitting the question to a vote of the people. If a provision of that kind was put in the bill he would cheerfully vote for it.

A message was received from the Governor announcing his approval of S B. 194, to provide for the s-lection of a permanent Home for the care and training of Feeble-Minded Children; S. B. 390, providing for the appointment of a Commission to make arrangements for the proper reception of the National Grange of Patrons of Husbandry: and S. B. No. 656, appropriating \$25,000 for the contingent expenses of the Senate.

At 5:50 P. M. the Senate took a recess until 8

The Senate reassembled at 8 P. M. and re-sumed consideration of the bill to create the County of Glenn.
Senators White and DeLong were granted leave of absence, to attend the State Prison

Caminetti stated that another defect in the bill was that it disorganized the Board of Super-visors of Colusa county and provided no remedy. there was no other reason why a Senator from another county should take an interest in the bill such a petition as the one shown ought to create that interest. If there had been any found in the minds of the friends of the bill such a petition in the minds of the friends of the bill that there were over \$5.00 people in the proposed new county they would not have accepted the amendment adopted yes; erday, taking out of the new cown y the town of Princeton. There were 1,305 votes cast in that territory at the last election, and there was a population of the thirty mines north and south by forty miles in width. [The speaker then read an editorial from the paper reterred to, which severely criticised the Governor's action in vetoing the bill.]

"Now, I appeal to the moral sense of both parties. Are such utterances just or applicable to Governor Waterman, who is considered by all who know him a man of hoxest integrity, clear perception, sound judgment and undoubted executive ability? It may be said that a man of such excellent attributes may err in judgment. Yes, he may, but no one who lays claim to consistency of thought or expression will attribute to his Excellency anything approximating to mercenary motives. Why, sir, the Governor is rich, but if he was as poor as a country parson his grand individualism would assert itself in manly independence.

"He is a man who dares to do right. Now let us see as to whether the Governor's judgment and decis on were at fault. The Attorney-General, his legal advisor, who is surely inferior to no legal light in the State, pronounced the measure unconstitutional. Bills, sir, often pass this House amid din and confusion without receiving due and necessary consideration, but when subjected to the Governor for his signature every line is scanned and every provision critically scrutinized, and the supposition is a just and proper verdict. Taking into consideration all these matters, in addition to my personal convictions, I deem it my duty to sustain the Governor's veto."

Renison said that he himself, and not an individual editor in Monterey, was the true representative of the people of that place. STATE PRISON INVESTIGATION. The investigation of the affairs of San Quentin Prison was resumed last evening by the Joint Committee of the Legislature, Senator White presiding. Ex-Director J. J. Scrivener was the first witness, and was examined in relation to the letters written by him to Captain Ben Chambers, and published with the McComb letters. The portion which referred to what he could "do for the boys if this scheme of his succeeded," he said had reference entirely to a private enterprise of his, and nothing to do with the prison. He acknowledged, however, that the "appointments" to which he referred in the same connection, had reference to prison appointments, but if these were secured, he said, then he would have room for some others in a private way, who were pressing him for appointments.

I know nothing about the building of the annex to the Warden's house at San Quentin. I understand from the Warden that it cost about \$2,800. I never knew anything about any account being kept or made of the cost of the building. I assume that the annual report of the Warden is correct. I cannot say perhaps that I ever read it through—pretty dry reading; pick it up occasionally and look it over some.

I heard that it has been said that I made a commission of \$700 on jute purchased from one nrm, but it is absolutely false. I never made a cent on jute purchases. Jute prices fluctuate greatly, often 5 per cent. in a day or two. The average profit of those firms from whom we purchase our jute supplies is about 2½ per cent.

Mr. Shanahan read to witness the testimony of Captain Thomas in which the latter gave circumstances under which the commission of \$700 was made by Director Sonntag on a jute purchase, as he claimed was indirectly admitted by Lichtenberg, from whom the purchase was made. WHEAT—The market is a sensitive one, being largely governed just at present by westher indications. Cloudy skies and south winds in the early morning give an uneasy and weaker tone to the situation, which is dispelled a couple of hours later by bright sunshine. There is time enough yet for good and seasonable rains, though believers in a dry season are gradually increasing in numbers. It is generally conceded that the main strength of the market lies in the absence of expected rain. Within a few days there has been active demand for Wheat, and much stock has changed hands on a basis of \$1.45 \text{ et al.} et life or standard quality, there being free sellers at the price.
